URL: www.strongsville.org/content/facilities.asp

Address: 18100 Royalton Road, Strongsville, OH

Phone: 440-580-3260 ext.5287

Contacts: Donald Golak, Head of Aquatic Maintenance

The Experience: Ehrnfelt's Aquatic Center has been using E-Z POOL, REVIVE!, and EZ SPA in their commercial pools and spa for the past three years. Ehrnfelt's Head of Aquatics Maintenance, Donald Golak, says that he has seen a huge difference in the quality of their water since starting API's commercial program.

E-Z POOL is applied twice-a-week in the center's 270,000 gallon indoor competition pool and their 90,000 gallon indoor activity pool. Don states that the pools are "cleaner than they've ever been" and he's even notice a small improvement in their indoor air quality.

Since starting the E-Z POOL and REVIVE! program, they've had "absolutely no algae and there's no longer a halo of scum around either of their pools!

EZ SPA is applied twice-a-week in the center's 9,000 gallon spa which has helped to keep the water "crystal clear" and has reduced the smell of chloramines. Don states that he used to have to change the water every week, now he only does it every 3 weeks even though the water is still crystal clear.

Don expresses that he went from using 7 different chemicals to now just 3 (E-Z POOL, EZ SPA, and REVIVE!) which has saved them a lot of labor time and upwards of \$10,000 a year!

See the Ehrnfelt Rec Center interview for details on the experience.
