## Treatments & Dosages:

### Option 1 Weekly Maintenance Dose: Best Proactive Chemistry Available

- balance pool water:
  - pH 7.2-7.6 \ Total Alkalinity 100-120ppm \ Calcium Hardness 350ppm (minimum)
- add (1) 8 oz scoop of E-Z POOL per 5,000 gallons directly to the pool weekly
- add preferred sanitizer (chlorine or bromine) to maintain a residual of 1.0 ppm

*Note: For initial startup dosage double the dose of E-Z POOL*

### Option 2 E-Z SOLUTION Automatic Daily Feed:

- this method involves the use of a solution tank and chemical feed pump to automatically feed E-Z POOL solution into the pool daily.
- to make solution fill 30 gallon tank with fresh water and add 5# of E-Z POOL to the tank.
- set chemical feed pump to automatically feed .8 gallons of E-Z POOL solution per day per 10,000 gallons of pool water.
- refill tank with E-Z POOL solution as needed.

*Note: Scoop included with E-Z POOL is 8 oz*

### Option 3 Pool Shock Dose:

- add (1) 8 oz scoop of E-Z POOL per 10,000 gallons directly to the pool as needed

### Option 4 Winterization Chemical Kit

- add (2) 8 oz scoops of E-Z POOL per 5,000 gallons directly to the pool at time of close

*Note: E-Z POOL can be used in saltwater pools as well*
