Revive!®

is a unique multi-function product that removes phosphates, stray metals, scaling carbonates & organic debris. Removing these contaminants greatly reduces many water quality issues.

Fix it with:

Revive! 32 oz - REV32

Maintain it with:

Revive! Weekly 32 oz - REVW32

Larger sizes available as:
RevivePRC

Preferred water balance ranges for Revive! Treatment:

pH 7.0-8.0
Chlorine: less than 25 ppm
Alkalinity: less than 250 ppm

Treatments & Dosages:

Weekly Maintenance Dose: Clarifier / Scale & Stain Prevention / TDS Maintenance

- add 4 oz of Revive! WEEKLY® per 10,000 gallons directly to the pool.

Note: cap of Revive! WEEKLY bottle is approximately 1 oz

Contaminant Removal Dose: TDS Reducer / Phosphate Reducer / Metal Remover

- add 12 oz of Revive! WEEKLY® per 10,000 gallons directly to the pool, or
- spray 12 oz of Revive! START UP / CLEAN UP® per 10,000 gallon over the surface of the pool

Note: If filtration system is operated during or after treatment, contaminants will be removed by filter, check filter pressure & clean filter as needed

Troubleshooting Dose: Cleanup / Startup Dose

- spray 32 oz of Revive! START UP / CLEAN UP® per 24,000 gallon over the surface of the pool
- after spraying Revive! turn circulation system off for up to 48 hours to allow contaminants to fall to the bottom of the pool, allowing easy removal by vacuuming to waste

Note: one quart of Revive! Treats up to 24,000 gallons, depending on contaminants present additional doses may be needed
